

How to use your Blue Bin

Filling, placement and storage

Using your bins

1

Fill it

Fill your bin and close the lid. It's ok if the lid is slightly ajar.

Make sure the material isn't packed in too tightly, so it will easily come out of the bin on pickup day.

Bins have a 60 kg weight limit. If they can roll easily, it's ok.

2

Place it

To ensure collection, carts need to be out by **7 a.m.** on your collection day. Place the bins on flat ground, not on a raised platform.

- **ALL Residential pick ups will be Front Street pick up.**
- Place bin wheels against the curb.

3

Space it

Leave enough space between and around all sides of your bins – this ensures bins can be safely collected. In winter, clear snow off your blue bin lid to keep recyclables dry. Keep cart area clear of snow and ice to prevent bins from freezing to ground.

4

Store it

Bins must be put away on non-pickup days. Pull your bins back onto your property by 7 p.m. on your collection day. Only put your bins out as needed on pick-up days.
